github.com/himanshuxbuilds | linkedin.com/in/himanshupradhan86929

PROFILE

Computer Science graduate (B.Tech, KIIT) pursuing a PGDM in AI & Data Science, with hands-on experience building machine learning, deep learning and LLM systems in Python and TensorFlow. Strong in data preprocessing, imbalanced datasets, model evaluation and interpretability, and in explaining technical designs to non-technical stakeholders.

EDUCATION

PGDM, Artificial Intelligence & Data Science 2025 – Present
Adani Institute of Digital Technology Management, Gujarat

B.Tech, Computer Science & Engineering 2021 – 2025
Kalinga Institute of Industrial Technology, Odisha
CBSE Class 12: Ryan International, Raipur (2021) | CBSE Class 10: Krishna Public School, Raipur (2019)

EXPERIENCE

Recruitment Intern, Havoc Consultants Pvt. Ltd. May 2026 – Aug 2026
- Analyzed recruitment workflows to find gaps in candidate tracking, follow-ups and pipeline visibility.
- Conceptualized Havoc HirePulse AI (candidate drop-off analysis) and designed Havoc TalentFlow, a recruitment CRM concept.

Full Stack Intern, Proptech ClearDeals Pvt. Ltd. Apr 2026 – May 2026
- Built a Property Leads Scraper in Python (Selenium, Streamlit, Pandas); worked on custom Odoo CRM modules and lead pipelines.
- Documented sales and backend workflows to find process gaps; designed a prototype Incentive Management System.

Strategic Partnerships Intern, Ethika Insurtech Broking Pvt. Ltd. Feb 2025 – Apr 2025
- Supported partnerships with OPD, healthcare and wellness organizations; helped design and present OPD benefit models.

PROJECTS

Pneumonia Detection from X-ray Images (Deep Learning) Feb – Apr 2024
- ResNet50 on 27,000 chest X-rays with class balancing, transfer learning and augmentation: 93.7% accuracy; Grad-CAM for interpretability.

University Admission Inquiry Bot (Agentic RAG) Nov – Dec 2025
- AI agent answering admission, placement and scholarship queries from policy documents using embeddings and FAISS; local LLM via Ollama.

Retail Shelf Stock Monitoring & SKU Gap Detection (Computer Vision) Nov – Dec 2025
- Product detection, counting and gap identification using bounding boxes, histogram segmentation and K-Means; forecasting for stock-outs.

AI Interview Bot (Generative AI) Dec 2025
- LLM-based interview simulator with dynamic question generation, evaluation logic and structured feedback in a modular architecture.

SKILLS

Programming: Python, SQL, JavaScript; data structures and algorithms
ML & data: TensorFlow, CNNs, transfer learning, K-Means, forecasting, NumPy, Pandas, Matplotlib, Seaborn, Grad-CAM
LLMs & delivery: Agentic RAG, embeddings, FAISS, Ollama, prompt engineering, Streamlit, backend workflows
Business: Requirements analysis, process optimization, documentation, stakeholder coordination

CERTIFICATIONS AND MORE

IBM: Generative AI Introduction and Applications; Generative AI Prompt Engineering Basics | Coratia Technologies: Machine Learning | Cognitive Class AI: SQL and Relational Databases
Languages: Hindi, English | Interests: Reading, Travelling, Sports
